

THE AXIS OF INTELLIGENCE

CONFIDENTIAL · THURSDAY ADDENDUM

Marketing Management

\$1,000 / month, one company. The 15 August partnership is unchanged.

Prepared for	Tim Kanak — Jupiter · Marco Castillo — Miami · Josh Kaufman — Miami · Chris Young — Naples
Prepared by	Jonathan Pastore · DeGenito Innovations, LLC (DeGenito.AI)
Date	August 20, 2026 · discuss Thursday afternoon with the 15 August partnership
Contact	jon@degenito.ai · +1 (561) 465-6666 · degenito.ai
Properties	App.PerkinsRoofing.net (factory, quotes, reporting) · Crm.PerkinsRoofing.net (GHL) · Staging.PerkinsRoofing.net

The ask	Amount
Marketing Management — one company (this sheet)	\$1,000 / mo
AI SEM — already in the 15 August partnership	\$200 / mo / branch · \$600 at three live offices
Shown appointments — already in the partnership	\$100 / show · DeGenito Facebook campaign
SEO / AIO · app + socials — already in the partnership	\$799 / mo · \$999 / mo
Media	Each live office's card · unmarked · seasonal + growth caps below
New public site	\$0 · gift · unchanged

The 15 August partnership PDF is not amended. This addendum sits next to it.

1. The offer

\$1,000 / month Marketing Management, Perkins Roofing Corp., one invoice. That is ChatGPT Ads, Google Business Profile / Maps, \$30-\$50 / day reel boosts, seasonal and growth caps, A/B, and reporting in the app. The partnership's **\$200 / mo / branch AI SEM** stays exactly as emailed — that is the license to the engine we built. We do not fold IP into this line and give it away. Franchisees, when they exist, are your ~8% and your lead routing. We still bill one company for this \$1,000. \$200 / branch follows the live offices already in the partnership.

Line	Amount	What it is
Marketing Management — one company	\$1,000 / mo	The week: ChatGPT, GBP/Maps, reel-boost ops, seasonal + growth caps, A/B, Friday numbers in the app. New. Not in the 15 August sheet.
AI SEM — already in the partnership	\$200 / mo / branch	Unchanged. Jupiter, Miami, Naples as each is live (\$600 at three). Engine IP. We do not reopen or discount this.
Social posting / Clip Studio / comments	Already in \$999	The app already runs the socials. Boost spend is new; posting is not.
SEO / AIO factory	Already in \$799	Pages feed ChatGPT and Maps citations. People ask AI who to hire; the factory is how we get named.
DeGenito Facebook appointments	\$100 / shown	Already in the partnership. Our campaign. GHL = Showed or Completed. Not inside the \$1,000.
Media	As in the partnership	Each live office's card, unmarked. Caps in \$4-5. We never hold spend.
Already paid	\$4,500 setup + creative	Not billed again. GHL is already stood up.
Franchise offices	\$0 from us on this line	You charge ~8%. You route leads. This \$1,000 does not become a file per franchisee.

2. Soft start — first ads, then the calendar

Perkins has never bought ads. Three to five shown appointments a week is the year-one exit, not week one, and not Christmas week. Low dollars until tracking, negatives, and a written cost/show exist. After day 90 the year-one calendar in \$4 takes over.

Window	On	Office media	Expectation
Days 0-14	GBP / Maps. Apply ChatGPT Ads. Google Search Broward: brand + repair. Bing import. Engine live (\$200 / live branch).	Google \$40-60 / day Bing \$10-15 / day \$1,500-\$2,250 / mo	Tracking live. 1-3 shown / week possible. No boosts yet.
Days 15-45	Add \$30-50 / day reel boosts on winning Clip Studio cuts — IG, TikTok, YouTube, Facebook. ChatGPT if approved.	+ \$900-\$1,500 boosts ChatGPT \$10-20 / day once live	Climb toward 3 shown / week. Kill a placement with 14 days and no attributable call.
Days 45-90	Scale only the channel with a written cost/show. No Miami-Dade or Naples ads until that writing exists.	Hold, or +20% on the winner only	3-5 shown / week is the year-one gate, not a December promise.

Planning month in the middle of days 15-45: **about \$2,400-\$3,600 media** plus **\$1,000** management plus **\$200 × live branches** plus \$100 × our Facebook shows. Fees do not move when we cut December. Media does move when a second market earns the right.

3. Competitive analysis — agencies and private equity

A percent-of-spend agency makes more when the budget goes up — including a loud December. A PE-backed roofer in Miami-Dade / Broward is a different animal: they will pay \$40–\$80 a click and \$7,000–\$15,000 a month in one metro to own the auction. Matching them dollar-for-dollar is how independents go broke. Beating them on cost per shown appointment is how you stay independent — and become something a buyer actually wants.

Google Ads management in 2026: **10–20% of spend** (street 15–20%) or **\$500–\$2,500 flat**, specialist floors \$750–\$1,500, mid desks \$1,500–\$2,500. Roofing shops: 15–20% with a \$500–\$1,000 minimum; Facebook management another \$500–\$1,500; full-service retainers **\$2,500–\$8,000 / month in fees, on top of media**.

Sources: ClicksGeek, Lotiva, Catmo 2026 Google Ads surveys; Inshalytics roofing agency cost, June 2026.

Shop	What they sell	Fees at \$3k media	Fees at \$8k / PE month	They win when...
Typical PPC % shop	15–20% of spend, \$500–\$1,000 floor.	\$1,000 floor	\$1,200–\$1,600	The budget goes up. December stays loud.
Roofing full-service agency	\$2,500–\$8,000 retainer. New portal.	\$2,500–\$8,000 + media	Same retainer + they ask for more media	You stay on the retainer.
PE-backed competitor (the auction, not a vendor)	\$7–15k / mo / metro. CPC \$25–50 replacement, \$40–80 storm.	They ignore a \$3k shop	They set the floor you pay	You try to outspend them.
WebPower (what you had)	\$2,295 hosting, topics, GMB. Not paid media.	\$2,295, no ads	\$2,295, no ads	The site stays up.
This addendum	\$1,000 management. \$200 / branch already in the partnership. \$100 only when our FB campaign shows.	\$1,000 + \$200 × live branches	Same fees at 2.5× spend and at a December cut	Cost/show falls. December is cut. Year two is earned.

4. What PE-competitive markets actually cost

Signal	Independent / national	PE / South Florida metro	What we do
Google Search spend / market	\$1,500–\$5,000 / mo typical	\$7,000–\$15,000 / mo. Tampa case: \$7k to ~30 quality calls.	Start \$1.5–2.2k Search+Bing. Step only with a written cost/show.
Non-brand CPL	\$124 average (SearchLight, 15 contractors, Q1 2026, \$310k spend)	\$150–\$250+ when PE and storm bids stack	We manage to shown appointment, not a cheap form fill.
Replacement CPC	\$22–\$42 typical converting terms	\$40–\$50+ in Dallas / Phoenix / Atlanta-class metros; FL storm \$40–\$80	Brand defense stays cheap. Do not buy vanity keywords PE is defending.
Marketing as % of revenue	5–10% established; 8–12% home services	12–15% in knife-fight metros. PE platforms spend to buy share, not CPA.	We spend less than PE and keep more of each job. Capacity is the cap, not the auction.
\$5M+ regional shop	\$10,000–\$30,000 / mo all marketing (Cider House 2026)	Plus LSA + PMax + brand conquest on every branch	Year-five media in our plan is still ~\$12–17k / mo — on purpose.

Sources: SearchLight roofing Google Ads CPL Q1 2026; Riverstone 2026 roofing PPC (converting CPC \$22–\$42, metro \$25–\$50); Cider House roofing marketing cost, July 2026 (\$1.5–10k+ Google, \$80+ CPC on hot terms, \$10–30k / mo at \$5M+); Best Roofer Marketing Tampa \$7k / mo to ~30 calls; Boomcycle / WebFX home-services 8–15% of revenue in competitive markets; LocalIQ 2025 roofing CPL ~\$79 category, Search much higher on non-brand.

Read that against a percent shop. At PE-month spend of \$12,000, 15% is **\$1,800** — and they will tell you to stay there in December. We still bill \$1,000 + \$200 / live branch and we cut the card. That is cost control. It is also how you do not train a buyer to see a business that only works when the auction is on fire.

Line	Stacked shop	This stack (partnership + addendum)
AI / Google ads management	\$1,000 min or 15–20% of spend	\$200 / branch — already in the partnership
Marketing management (Maps, ChatGPT, boosts, caps, A/B)	Inside a \$2,500–\$8,000 retainer, or missing	\$1,000 / mo, one company — this sheet
Factory + app + socials	Usually a second vendor	\$799 + \$999 — already in the partnership
Fees before a dollar of media	\$2,250–\$8,000+	\$1,000 + \$200 × branches + \$799 + \$999 (at 3 branches: \$3,598)

5. Year-one calendar — seasonal, then it grows

Florida is not Ohio, and it is not flat. Hurricane window is 1 June–30 November. December is the low. A percent shop and a PE platform both have reasons to keep spending. We do not. The calendar below is year one on one live market. The right-hand column is what that same month looks like in year two **only if** year one wrote a cost/show and a second geo is on a written go. No second market, no second spend.

Month	Season	Y1 media (1 market)	Y2 media if 2nd market earned	What we protect
Sep 2026	Ramp / late storm	\$2,400–\$3,600	— (still Y1)	Learn. Broward only.
Oct 2026	Storm peak	\$3,000–\$3,600	—	Repair + insurance. Kill waste weekly.
Nov 2026	Winds down	\$2,400–\$2,800	—	Do not spend October dollars in November.
Dec 2026	LOW	\$900–\$1,200	—	Brand + leak only. Boosts off. ~\$2k banked for March.
Jan 2027	Still slow	\$1,400–\$1,800	—	Cheaper CPCs. No fake New Year blast.
Feb 2027	HOA / spring	\$2,000–\$2,400	Gate: written Y1 cost/show?	Metal A/B returns. Decide Miami.
Mar–May 2027	Spring	\$3,000–\$3,400 / mo	If go: + \$2,500–\$4,000 Miami (PE-aware)	December's unspent dollars belong here.
Jun–Jul 2027	Hurricane open	\$3,400–\$3,800 / mo	Two-market \$6,500–\$9,000 / mo	Crew capacity is the limit, not the ad account.
Aug–Oct 2027	Peak / Y2 starts	\$3,600–\$4,200 / mo	Two-market \$7,500–\$11,000 / mo	Daily storm cap. Kill the week if cost/show blows.
Nov–Dec 2027	Wind down + LOW	Nov \$2.4–2.8k · Dec \$0.9–1.2k	Nov \$4.5–5.5k · Dec \$1.8–2.4k	December still cuts, from a bigger run-rate. Every year.

Year-one media on one market: about **\$32,000–\$38,000**. A “stay visible” \$3,200 through Dec/Jan wastes **\$4,000–\$6,000** in the trough. Year-two media, two markets, still cutting December: about **\$70,000–\$95,000** — that is growth, and it is still under one PE metro (\$84,000–\$180,000 at \$7–15k × 12). We do not open Miami because the calendar flipped. We open Miami because Broward has a written cost/show and a crew that can take the work.

Sources for the shape: NOAA Atlantic hurricane season (1 Jun–30 Nov); JobNimbus winter playbooks (Nov–Dec scale back, keep leak terms); WebFX 2025–26 home-services seasonality (replacement-cost queries trough in December). South Florida is flatter than the Midwest and still not flat in the holidays. Y2 Miami dollars assume PE-competitive CPC, not a copy of Broward's year-one rate.

Where the numbers live

Spend, the seasonal cap, the growth gate, A/B (brand vs metal), boosts, CallRail to GHL to shown, cost per show — all of it comes back into **app.perkinsroofing.net**. Friday is a view. Same login as the estimator, the archive, Clip Studio, and Tim's comment inbox. That is the asset: one operating system a buyer can underwrite. Franchise later still logs in here. We do not become twelve QuickBooks customers.

In \$200 / branch (partnership)	In \$1,000 Marketing Management	Not either
The engine: constraints, negatives, geos, bids, Bing import, conversion import. Runs in December at \$50/day the same as June at \$150/day.	ChatGPT Ads, GBP/Maps, reel-boost ops, seasonal + growth caps, A/B, Friday numbers. The week.	Ad spend. Semrush. CallRail. \$799 factory. \$999 app hours. Tim's YouTube replies. A second \$1,000 per franchisee. Guaranteed 3–5 shows the week of Christmas.

6. Five-year plan — build something you can sell if you want

We do not have your P&L on this page, so we will not invent revenue. The plan is in units we can both count: shown appointments, live markets, whether you are still on every estimate, and whether a buyer sees a system or a founder. Sold dollars and EBITDA are your close rate and your crews. Marketing's job is a repeatable, off-season-aware engine those numbers can sit on.

Most roofing companies still sell at **2–5× EBITDA** (median near 3.3×). That is a founder with a truck. Companies in the \$3–10M revenue band with transferable ops land **5–7×**. Above \$10M with growth, **7–9×**. Private equity pays **6–9×** almost only at **\$3M+ EBITDA** with management depth. Storm-chase revenue is discounted to **2.5–3.5×** because it is not repeatable. The two highest-leverage moves on the multiple: **get the owner off sales**, and **show systems a stranger can run** — estimator, CRM, lead engine, Friday numbers. That is this app. That is why this \$1,000 is not a campaign. It is the habit that makes the company worth more than Tim.

Sources: Profitability Partners roofing valuation 2026 (4–9×; <\$3M rev 3–5×, \$3–10M 5–7×, \$10M+ 7–9×); Auxo Capital 2026 bands (\$1.5–3M EBITDA 4.5–6.5×, \$3–7.5M 5.5–8×); Legacy ETA 2026 (median completed deal ~3.3×; PE 6–9× at \$3M+ EBITDA); CTA / Peak 2026 (storm-chase 2.5–3.5×; commercial-maintenance +0.5–0.8 turns).

	Year 1 to Aug 2027	Year 2	Year 3	Years 4–5
Live markets	Broward. Miami brand-only if needed.	Miami full, if Y1 cost/show is written.	Naples + first franchisee routed at your 8%.	3 company branches + N franchisees.
Shown / week (exit rate)	3–5. Ramp from 1–3.	7–10 company.	10–15 company, plus routed franchise leads.	15–22 company. Franchise book separate.
Media (year)	\$32–38k. Dec cut.	\$70–95k. Two PE-aware metros. Dec still cuts.	\$100–140k. Third geo + franchise support, not PE vanity.	\$150–200k. Still under one PE platform's three-metro burn (~\$250–540k).
\$200 / branch	1–2 live.	2.	3 company.	3 company. Franchisees are your royalty, not our SKU.
What a buyer sees	First paid engine. App is the books for marketing.	Second market clone. Playbook, not a heroics week.	Owner off a share of estimates. Maria / GHL / estimator run the day.	Royalty + systems + retail mix. Not a storm-chase tape.
Multiple you are building toward	Still founder-weighted. Do not shop it.	Leaving 3× territory if the books are clean.	Entering 5–6× if EBITDA is real and you are not the closer.	5.5–8× if \$1.5M+ adj. EBITDA and owner-light. 6–9× only if you ever want PE and the earnings are \$3M+.

15–25% more shown appointments a year, gated on crew. You do not have to sell. You should be able to.

Illustration only — close rate is yours. 4 shown/wk x 48 wks x 25% close x \$20k ticket ~ \$1.0M incremental. Year-five at 18/wk ~ \$4.3M. At 12% EBITDA that is ~\$120k vs ~\$520k. 3.3x vs 6x on \$500k transferable EBITDA is \$1.35M of enterprise value.

7. Acceptance

Ninety days, then month-to-month on 30 days' written notice — same spine as the partnership retainers. December media cuts do not cut the \$1,000 or the \$200 / branch. A second market is a written go, not an automatic invoice. Adding a franchisee does not add a DeGenito \$1,000. By signing, Perkins **adds** Marketing Management at \$1,000 / month. The 15 August partnership is otherwise unchanged: \$200 / mo / branch AI SEM, \$799, \$999, \$4,500 paid, \$100 / shown, \$0 Astro site, media on each live office's card. We do not bill franchisees.
